

قُلْ لَوْ كَانَ الْبَحْرُ مِدَادًا لِكَلِمَاتِ رَبِّي لَنَفِدَ الْبَحْرُ قَبْلَ أَنْ
تُنْفَذَ كَلِمَاتُ رَبِّي وَلَوْ جِئْنَا بِمِثْلِهِ مَدَدًا ۝ قُلْ إِنَّمَا أَنَا بَشَرٌ
مِّثْلُكُمْ يُوحَىٰ إِلَيَّ أَنَّمَا إِلَهُكُمُ اللَّهُ وَاحِدٌ فَمَنْ كَانَ يَرْجُوا لِقَاءَ
رَبِّهِ فَلْيَعْمَلْ عَمَلًا صَالِحًا وَلَا يُشْرِكْ بِعِبَادَةِ رَبِّهِ أَحَدًا ۝

Say you, 'If the sea be the ink for the words of my Lord, then necessarily, the sea would be exhausted and the words of my Lord would not come to an end, though We may bring the like of it for help.

Say you, 'Apparently in facial outlook of a man, I am like you, I receive revelation that your God is one God, then who-so-ever hopes to meet his Lord, he should do noble deeds and associate not any one in the worship of his Lord.

Lieutenant General Qamar Javed Bajwa, HI (M)
Chairman Board of Governors, Army Burn Hall Institutions

Message of the Chairman

Board of Governors

It gives me immense pleasure to address the young Hallians through “The Hallmark”. The glossy magazine is reflective of creative ability and intellectual depth of the young writers. The pictorials display a vibrant view of a wholesome life and year round activities of students at the campus. The magazine adequately signifies optimistic and positive feelings of students and their successful approach towards life.

The success of students always owes to the institution. Burn Hall, I must proclaim, is one of the leading institutions of the country, which is providing vibrant and conducive environment to its students for their wholesome grooming and personality development through a host of co-curricular and extra-curricular activities. The illustrious alumni of the college have greatly benefited from this healthy and harmonious environment and are now rendering valuable services for the prosperity and development of our nation. I am sure that you will carry the rich values and traditions imbibed here to greater heights.

Dear Hallians! Today our country is passing through critical phase of its existence and is entangled, both internally and externally, in grave challenges. This prevailing situation mandates you to prepare yourselves to overcome all the present and future challenges by attaining quality education along with high standards of moral values and self discipline. You, as young eagles of this great institution, must inculcate the noblest values of tolerance, truthfulness and optimism so that you can rub shoulders with your elders as responsible members of the global community. I urge you to attain academic excellence by working zealously and wholeheartedly, not only to achieve your personal aims but also the national goals. You are the future of our country; lead this nation to the path of glory, progress and prosperity.

In the end, I would like to appreciate the Editorial Board for their hard work and efforts put in for the publication of the wonderful magazine. The creative renderings of the young Hallians are most entertaining and justly praiseworthy.

May Allah Almighty bless you with unsurpassable successes in future. (Ameen!)

Lieutenant General Qamar Javed Bajwa, Hilal-i-Imtiaz (Military)

Major General Nadeem Raza, HI (M)

Deputy Chairman Board of Governors, Army Burn Hall Institutions

Message of the Deputy Chairman

Board of Governors

I am pleased to communicate with the young Hallians through the current issue of “The Hallmark”. The magazine is not merely the collection of words and images; it is rather an effective forum for Hallians to express their ideas and opinions on various issues in an organized and skillful manner.

The scholarly taste and academic flair of the students portrayed in the magazine reflect that Army Burn Hall College for Boys focuses on overall grooming of the students and provides a creditable inclusion of the curricular and co-curricular activities for the Hallians all the year round. Through these activities, the students are infused with a sound blend of knowledge, socio-ethical values, intellectual and moral grooming and physical development.

Dear Hallians! The present era poses daunting challenges of unprecedented advancement in every sphere of life and human endeavour. Being the future of Pakistan, you must embark upon these challenges with enthusiasm and sturdy determination. The dedicated administration and the Faculty of Army Burn Hall College for Boys are employing all measures necessary for shaping the character of its alumni, inculcating moral values in them and preparing them for a life of leadership, selfless service and personal fulfillment. Therefore, make full use of these opportunities and equip yourself with the scientific and general knowledge wholeheartedly. With your devoted hard work and sound basic knowledge, you will in future be able to bring constructive changes in society which in long run ensures the progress of our country.

In the end, I extend my felicitations to all young Hallians for their valuable contributions. I also congratulate the Editorial Board and the College administration for publishing a quality magazine.

I wish you all the best for your future endeavours.

Major General Nadeem Raza, Hilal-i-Imtiaz (Military)

Brigadier Mukhtar Muhammad
Principal, Army Burn Hall College for Boys

Message of the **Principal**

It gives me immense pleasure to record my feelings for the current issue of “The Hallmark”. The magazine provides a window to the creative world of Army Burn Hall College for Boys, which has very eco-friendly campus and is equipped with state of the art infrastructure. We have well equipped laboratories and classrooms to help students in attaining the desired standards in academics and related skills. The campus has adequate sports infrastructure to take care of sports and recreational activities of the students.

Empowering our students with conceptual knowledge, wisdom and confidence at the academic level is our foremost priority. The infrastructure, facilities and equipments combined with a galaxy of competent and dedicated faculty contribute to effective teaching learning activities. The students take full advantage of these opportunities and make their Alma mater proud by succeeding with flying colours in Federal Board and Cambridge University examinations.

After taking due care of the academics, the main focus of the Institution is to mould our students into better human beings and instill in them values which are embedded for life. We aim to provide an overall development that nurtures them towards attaining refined and balanced personality. The institution provides every student with soft skills and educational skills by exposing them to a series of co-curricular and extra-curricular activities round the year.

I have firm belief that success is inevitable where there exist; foresightedness, firm determination, hard work and discipline. I am sure that the graduates of this great institution will be proud of themselves as confident and successful members of the society, ready to contribute positively for the prosperity and sovereignty of the country. I wish all the students and faculty a successful and rewarding career.

Lastly, I admire the contributions made by teachers and students along with the good work done by the editors due to which the publication of the magazine has become possible.

Brigadier Mukhtar Muhammad

EDITORIAL BOARD

Wissam Tahir, Maj Khurram (Adjt), Miss Bushra Jehangir (Editor), Mr Tashfeen Abbasi (Editor-in-Chief), Col Muhammad Latif (CI), Brig Mukhtar Muhammad (Principal), Lt Col Muhammad Khalid (SI), Mr Azhar Ahsen (Editor), Qazi Tauseef (Editor), Waleed Murtaza, Hamza

From the Editor's Pen

Pen-the first ever tool God Almighty went for is duly mightier than what might be mightiest in the eyes of the world. Words-the supreme creature of pen and the supreme identity of the supreme being are pricier than what is the priciest of the entire world, indeed priceless!!!!!!

Book-the wordless world of the words is unavoidably classier than what the classy claim to be the classiest of all.....!!!!!! Yes dear readers, the book. The same is lying before you, the Hallmark! The petals of this very flower incense all its readers the perpetual fragrance.

Teacher sharing their experiences, so are the taught-Hallians!!!! It is an account of a delight some circumnavigation. Besides, the book does attempt to shift its readers from the bitter realities of the world to an ideal state of mind, then takes them back to the real world but with the art how to abate as well as encounter the challenges of life. It is where students employ their full blast intellect to transform potentialities into realities.

That's what the ultimate aspiration of every single person is! Finally, your true appreciation alongwith honest critique will be regarded as a milestone in further advancement as well as enhancement of the same-Hallmark.

Tashfeen Abbasi

LIFE AT THE CAMPUS

Principal's Report

Annual Parents' Day and Prize Distribution Ceremony 2013

Honourable Brig Tahir Hameed - Commandant Baloch Regimental Centre Abbottabad, Distinguished Guests, Dear Students, Ladies and Gentlemen,

Assalam-o-Alaikum

On behalf of the College faculty, young Hallian and my humble self, I welcome you all in this august gathering of Annual Parents' Day and Prize Distribution Ceremony 2013. Your presence has added grace and glory to this momentous occasion and is really a source of honour for us. I am thankful to Brig Tahir Hameed for gracing us with his presence as the Chief Guest on this auspicious occasion.

Ladies and Gentlemen!

Army Burn Hall College for Boys towers prominently among the country's illustrious public educational institutions. It symbolizes prestige, magnificence, excellence and glory. The alumni of this great institution have brought laurels to their 'Alma Mater' in its past, present and the coming generations

of Hallians will, God willing, surpass the glory attained by their predecessors. Students, here, are fortunate enough and privileged to have an environment, where they can enlighten themselves with the divine light of knowledge and utilize their energies with a sense of purpose and discipline. Here, we are striving hard to make them a solid and positive addition to our society. By the Grace of Almighty Allah, we are successfully pursuing this goal with the unending passion and commitments.

Ladies and Gentlemen!

The college provides an ideal teaching and learning environment to the students. They are provided ample opportunities to promote their intellectual, moral and creative abilities through various curricular and co-curricular activities. The focus of the college, however, remains at the wholesome growth of their personalities.

Ladies and Gentlemen!

The performance of the students in secondary school certificate and O' Level Examinations has been remarkable. In SSC part-II exam, 166 students appeared. 124 students secured A1 and A grades, which is 74.70 % of the total. 151 students obtained 1st division which is 90.96 %. 29 students scored 100% marks in Physics, Maths, Chemistry and Biology. The overall GPA is 5.08. It is worth mentioning that our student, Anwar-ul-Haq secured 1003 marks out of 1050, which is the ever best in the College history. In SSC Part-I exam, 231 students appeared. 160 students secured A1 and A grades. 207 students obtained 1st division which is 89.6 %. 40 students scored 100% marks in Physics, Maths, Chemistry and Biology. The overall GPA is 4.89. Our student, Sajawal Sharif secured 501 marks out of 525 which is 95.43%.

In the O' Level examination, 25 students appeared in 8 subjects, with a pass percentage of 100 %. A total of 140 A*s, As and Bs were obtained by the students. It is important to note that A* starts from 90% and above, A starts from 80% and above and B starts from 70% and above marks. It is worth mentioning that our student Mohammad Ali obtained 5 A*s and Mohammad Kashif obtained 4 A*s respectively.

In Higher Secondary School Certificate Part-II Exam, 141 students appeared. 29 students secured A1 and A grades and 74 students clinched 1st division in the exam; the overall GPA is 3.18.

In Higher Secondary School Certificate Part-I Exam, 252 students appeared: 61 students secured A1 and A grades and 124 students obtained 1st division. Our student, Salar Haider obtained 501 marks out of 550 which is 92%.

**Ladies and Gentlemen!**

Besides, focusing on the achievement of academic excellence, the College pays due emphasis on personality development of its students, Regular co-curricular and extra-curricular activities are organized which include various events like debates, Declamations, Qiraat, Hamd-o-Naat, Quiz as well as sports competitions. Hallians are also provided ample opportunities to visit the leading educational institutions of the country to take part in various competitions. This year, our students participated in the All Pakistan Bilingual Declamation Contest at FC University Lahore, Pakistan Air Force Academy Risalpur and Cadet College Batrasi, In addition to all these, College has also organized the All Pakistan Burn Hall Bilingual Declamation Contest. The Commandant PMA, graced the occasion with his presence as the Chief Guest. 19 institutions from all over the country participated and the trophy was won by the Pakistan Military Academy Kakul.

These results and activities clearly reflect the untiring and dedicated efforts of our faculty and the hard work of Hallians. All parents should be rightly proud of this institution where their sons are undergoing quality education and training.

Ladies and Gentlemen!

My report will be incomplete if I fail to express my sincere thanks to all members of the Board of Governors, other Heads of the Military and Civil institutions, particularly the PMA, the Regimental Centres and all others, whose help and support was always forthcoming. Above all, we are grateful to all parents for their tremendous co-operation. In the end, I would like to extend my heartiest congratulations to all the prize winners.

I once again thank the Honourable Chief Guest Brig Tahir Hameed for sparing his precious time for us and of course to all of you for your valued participation in the function. May Allah, lead us all on the right path, for the progress and prosperity of our motherland. Ameen!

God Bless Burn Hall!

God Bless Pakistan Army!

God Bless Pakistan!

I thank you once again.

Chief Guest's Address

Annual Parents' Day And Prize Distribution Ceremony 2013

Brig. Mukhtar Muhammad, Principal Army Burn Hall College for Boys, respectable parents, distinguished guests and my dear Hallians,

Assalam-o-Alaikum!

It is a singular honour and privilege to be here as the chief guest of this auspicious occasion, when this edifice of learning is showing its grandeur by holding its Parents' Day function. Indeed, it is one of the most important events when all high achievers are rewarded in a befitting manner; and the others, who do not get an opportunity this time, reinvigorate their spirits to visit the podium next year.

Ladies and Gentlemen!

To grow up as good citizens, one needs certain tenets. It is in our hands — in the hands of our schools, mentors and parents — to inculcate these tenets in them to help them grow up as good human beings, who may positively contribute to the society, who are governed by the discipline from within not by the external forces, who think about giving back to the society, who love all people irrespective of caste, colour or creed. And I have firm belief that Army Burn Hall School and College is top of the range in this regard.

Dear Parents!

Bright faces, I see here today, are our future. We have high hopes for them. They may be the dream come true of Iqbal: they may follow the footsteps of the Quaid-e-Azam in true spirit; they may, tomorrow, grow up to be the scientists of their own times. By the Grace of God, I see them controlling the reins of the yet to come.

My dear Hallians!

Being educated is our religious obligation without which, we are at the level of animals. Always have mind; ignorance fails a man to resort to reason. In the Holy Quran surat Taha, ayat 114, the Almighty tells His Prophet PBUH to say, 'O! My Lord increase knowledge in me.'

BOYS JUST FEEL! Allah's emphasis is on education itself because He knows, the absence of good knowledge helps let loose the forces of evil whereas constructive knowledge endows man with the light of wisdom and perception, to cement his faith in the Omniscient.

My dear students!

I need to add here that the true grace of a student becomes luminous with the integrity and devotion to studies. You being students of an elite educational institution, have great prospects to join the armed forces and civil services. The number of Hallians undergoing training at the Pakistan Military Academy and other institutions assign it the status of a feeder institution to Armed Forces. As per the Principal's report, I feel you all are highly privileged so try to gain maximum benefit from all the facilities.

Dear boys!

While you should be engrossed in achieving excellence in academics, you should not, at the same time forget, that education does not mean the nitty-gritty of grammar or obtaining marks or handling sciences alone. Rather, education truly means intellectual, emotional, cultural and social development of an individual.

Remember! It's not marks alone that make a man.

Dear Hallians!

You should never be a uni-dimensional individual who is good at producing numbers only; you should know things like becoming a good neighbour as well. I urge you to always wear the badge of the Army Burn Hall with honour and gratitude; you display it with honesty and integrity. You are the ambassadors of the Army Burn Hall. Aspire to leave behind a legacy which you will always be remembered and admired for.

Dear audience, I thank you all for your patient listening. It's time to bid farewell now!

May Allah, the Greatest Creator, the Giver and the Protector of Life, bless you all, bless the Burn Hall, bless those who have graced today's ceremony and those who will do so in many years to come as faculty members, administrators, parents, guardians, students, guests, well-wishers and visitors.

Army Burnhall Zindabad!
Pakistan Paindabad!

The Award Winners

Annual Prize Distribution Ceremony for this year was held on 6th November, 2013. A function was arranged in the beautiful auditorium of Army Burn Hall College. Brigadier Tahir Hameed, Commandant Baloch Regimental Centre Abbottabad. Following trophies and prizes were awarded to the outstanding students in different categories:-

FSc 2nd Year

Pre Medical

- 1st Ebad-ul-Haq
- 2nd Ahsan Ishtiaq Awan
- 3rd Umer Waseem Ahmed

Pre Engineering

- 1st Ahsan Rashid Qazi
- 1st Muneeb-ur-Rehman
- 2nd Rana Muhammad Noman
- 3rd Omer Ishtiaq

Computer Science

- 1st Khush Bakht Sheeraz
- 2nd Romeel Ahmed Sanwal
- 3rd Umer Wahid

FSc 1st Year

Pre Medical

- 1st Salar Haider
- 2nd Ammar Khan

3rd Bilal Khalid

3rd Ali Maalik

Pre Engineering

- 1st Muhammad Hammad Bashir
- 2nd Ibtisam-ul-Haq
- 3rd Haider Khan

Computer Science

- 1st Muhammad Umer
- 2nd Abdullah bin Anjum
- 3rd Nauman Khan

As Levels

- 1st Nisar Ahmed
- 2nd Muhammad Zeerak Khan
- 3rd Muhammad Adam Khan

A Levels

- 1st Umer Farooq
- 2nd Hamid Mahabat Khan
- 3rd Aasim Arshad Abbasi
- 3rd Zain Imran Shah

Matric

- 1st Anwar-ul-Haq
- 2nd Muhammad Ali Javed
- 3rd Fahad Zaman Khan

O Levels

- 1st Syed Muhammad Ali
- 2nd Muhammad Kashif
- 3rd Attal Khan

9th

- 1st Sijawal Shareef
- 2nd Wajih-ul-Hassan
- 3rd Khizar Ali Shah

Junior Cambridge

- 1st Hamza Bin Abid
- 2nd Zeeshan Ahmad
- 3rd Sufian Saeed

8th

- 1st Abdul Rehman Khan
- 2nd Musleh Jamal
- 3rd Muhammad Abbad

Pre Junior Cambridge

- 1st Khalid Ashfaq
- 2nd Anique Tahir
- 3rd Zoraiz Naeem

7th

- 1st Muhammad Zakria Shahzada
- 2nd Muhammad Hamza
- 3rd Hasnain Zain-ul-Abideen

Academics Trophy

Sultan Tipu Shaheed House

Co-curricular Activities

18th All Pakistan Bilingual Declamation Contest - 2013

The participants with the Chief Guest Maj Gen Nazir Ahmed Butt, HI (M)

The importance of public speaking is beyond debate. Like every year, 18th All Pakistan Burn Hall Bilingual Declamation Contest was held on November 5th 2013, in the auspicious auditorium. Every member of the college faculty poured his share in this mega event. A number of renowned institutions tested their powers for the trophy. Some of the notable institutions were Pakistan Military Academy, Kakul, Pakistan Air Force Academy Risalpur, GC University Lahore, Military College Jhelum and Army Burn Hall College for Girls. A dinner was hosted in the honour of the participants a night before the programme. The Head of English Department Mr Tashfeen Abbasi briefed the teams about the upcoming event. All the participants displayed wonderful skills of oratory. This time, the coveted trophy was clinched by Pakistan Military Academy, Kakul. The Chief Guest Major General Nazir Ahmed Butt, HI (M), Commandant, PMA, Kakul gave away the prizes to the winning contestants. He showed his great satisfaction at the performance of the speakers and added that our youth were ready to lead the nation to the horizons of progress and prosperity.

THE WORLD AS I SEE IT

Why I love my country

Sardar Dilawar
6th Green

East or West homeland is the best. Everybody has a special love for his country so do i. the name of my country is Pakistan. Allama Iqbal was the dreamer of Pakistan, but it was turned into reality by Quaid-e-Azam.

In Pakistan we have the world's largest salt mine, second largest coal reserves and fourth largest cotton producer. The people living here are very hospitable and very kind. They love each other.

We have the worlds largest and the bravest Army who sacrificed their lives in Siachen Glacier, the world's most difficult battle field. The climate

here is very good. We have many beautiful cities. We have very fertile soil and the best vegetation. My country is very peaceful.

Despite different languages and different dresses, we are one nation with our national language. Hockey is our national game. Eagle is our national bird. Markhor is our national animal. My country is an agricultural country. We have the bravest active and strong armed forces. They protect us from our enemy countries. Army is securing the land, Navy is protecting us from sea attacks and Air force is fighting in the sky.

So, I love my country very much.

Quotable Quotations

Mahad Khan
10th D

1. We judge ourselves by what we are capable of doing, while others judge us by what we have already done.
2. Prosperity is a great teacher; adversity is a great possession that pampers the mind.
3. Self conquest is the greatest of victories.
4. Man is his own worst enemy.
5. It is easy to flatter, it is harder to praise.
6. Hope for the best, but prepare for the worst.
7. Sweets with sweets war not; joy delights in joy.
8. Reason and judgment are the qualities of a leader.
9. To be conscious that you are ignorant is a great step to knowledge.
10. Nothing is sillier than silly laughter.
11. The love of money is the root of all evil.
12. A mother is a mother still, the holiest thing alive.

Miraj and the Gift Of Allah

Muhammad Ammar Masood
XII B

At the age of 50 years, 4 months and 19 days, the Prophet Hazrat Muhammad (PBUH) went on Miraj. It was the Sunday, 27th of Rajab. The Prophet (PBUH) was sleeping at Umme Hani's house. The angels Hazrat Jibrael and Hazrat Meekail (AS) came to take the Holy Prophet (PBUH) on Miraj. Prophet (PBUH) went on Miraj sitting on an animal called Jadood also named as Buraaq. Initially, the Prophet (PBUH), was taken to Maqaam E Ibrahim and then to Masjid e Aqsa. Hazrat Muhammad (PBUH) led the prophets of all times in prayer. The Prophet (PBUH) met Hazrat Adam (AS) at the first sky. Then Holy Prophet (PBUH) was taken upward to paradise and was shown different places over there. After his meeting with Allah, Prophet was presented the gift of Namaz. Offering fifty prayers were made compulsory for the Muslims. On his return, Prophet (PBUH) told about the compulsion of offering 50 prayers as a gift. Hazrat Musa (AS) replied "I Know these people very well as I have been with them, they will be unable to do so". Hazrat Musa (AS) requested the Holy Prophet (PBUH) to go back and request Allah and request

Allah to reconsider it as the Ummah is not capable of offering 50 prayers a day. The Prophet (PBUH) went back and Allah Almighty decreased it to 45. Prophet came back and told Hazrat Musa. Hazrat Musa (AS) told the Prophet that Ummah still would not be able to do so. Therefore Prophet (PBUH) had to go back for the second time. Again 5 prayers were reduced but still Hazrat Musa (AS) was not satisfied. So, Prophet (PBUH) nine times and every time 5 prayers were decreased. When Hazrat Musa (AS) requested Holy Prophet (PBUH) to go back for the tenth time tears came in Prophet's eyes and he replied "Is the Iman (faith) of my Ummah so weak that they will not even offer five prayers a day"

Today if we have a look at our surroundings, we see a lot of people not even able to offer five prayers a day. We are willing to watch movies, spend time in playing games, watch TV, listening to music etc, but we are unable to spare 10-15 minutes for our prayers.

If you live long enough, you'll make mistakes. But if you learn from them, you'll be a better person. It's how you handle adversity, not how it affects you. The main thing is never quit, never quit, never quit.

— William J. Clinton

Earth without Plants

Taha Waseem

Plants play the most important role in the cycle of nature. Without plants, there could be no life on earth. Also, animals are incapable of making their own food, depending directly or indirectly on plants for their supply of food. The oxygen, we breathe, comes from plants. Through photosynthesis, plants take energy from the sun, carbon dioxide from the air and water and minerals from the soil. They then give off water and oxygen which is useful for existence. Plants also provide habitats for animals. Plants provide shelter and safety for the animals. Plants provide shade, help moderate the temperature. They are also important sources of useful products that people use such as food, fibers and medicines. Plants beautify our environment. The element of beauty makes them an important element of human world. Plants

are used in decorations. People decorate their houses with flowers and also lawns of their houses by growing and planting different plants. They absorb carbon dioxide from our atmosphere, thus cleaning environment. Everything that is alive on this planet is dependant directly or indirectly on plants. Since without them life on earth would not exist. Plants are the actual resources of life on the earth. Our planet earth is called a green planet only due to presence of plants. Even the presence of plants around the area of human life relieves stress. We see many people growing small plants in their houses to get fresh air. Plants help in minimizing air pollution. Plants have a cooling effect on the atmosphere. Hence, without plants we can't imagine a life on earth. And in their absence all life would die.

If you live long enough, you'll make mistakes. But if you learn from them, you'll be a better person. It's how you handle adversity, not how it affects you. The main thing is never quit, never quit, never quit.

- William J. Clinton

Of Studies

Ameer Hamza
XII B

Studies serve for delight, for ornament and for ability. Their chief use for delight, is in privateness and retiring; for ornament, is in discourse; and for ability, is in the judgments, and disposition of business. For expert men can execute, and perhaps judge of particulars, one by one; but general counsels, and the plots and marshalling of affairs, come best, from those that are learned. To spend too much time in studies is sloth; to use them so much for ornament, is affection; to make judgments wholly by their rules, is the humor of scholars. They perfect nature, and are perfected by experience; for natural abilities are like natural plants, that need pruning, by study and studies; themselves, do give forth directions too much at large, except they be bounded in by experience. Crafty men contemn studies, simple men admire them, and wise men use them; for they teach not their own use; but that is a wisdom without them, and above, won by observations.

Read not to contradict and confute; not to believe and take for granted; nor to find talk and discourse; but to weigh and consider. Some

books are to be tested, others to be swallowed, and some few to be chewed and digested ; that is, some books are to read only in the parts , others to be read, but not curiously; some other to be read wholly, and with diligence and attention. Some books also may be read by deputy, and extracts made of them by others; but that would be only in the less important arguments, and the meaner sort of books, else distilled books are like common distilled waters, flashy things. Reading maketh a full man; conference a ready man; and writing an exact man. And therefore, if a man writes a little, he had need of a great memory; if he confers little, he had need have much cunning, to seem to know, that he doth not. History makes men wise; poetry witty; the mathematics subtle; natural philosophy deep, moral grave; logic and rhetoric able to contend.

There is a phrase comes from “Ovid’s Herioclus-Book15”

“Abeunt studia in more”

“Studies pass into and influence manners”

If you live long enough, you’ll make mistakes. But if you learn from them, you’ll be a better person. It’s how you handle adversity, not how it affects you. The main thing is never quit, never quit, never quit.

— William J. Clinton

Pakistan's Wild Life

M. Hunanin
10th F

Wildlife is one of the most attractive things in the world. It gives us chance to see different creatures of God. It has its own importance and significance for a country. Due to it tourism increases in that country, its credibility boosts at international level.

It is present in different countries like Africa, which is one of the biggest sources of wildlife. Its savannas are popular, and it attracts large number of people. Due to its wildlife, Africa is one of the most attractive places in the world.

When it comes to Pakistan, first of all, Pakistan does not have much wildlife, and the remaining wildlife is declining day by day. Our national animal is also in danger, because of hunters. It is present in Gilgit, Baluchistan and other parts of Kashmir.

Markhore are raised for meat, hair, milk, and skins. Their hair is generally coarse and harsh

but is very suitable for carpets. There are various reasons behind the decline of wildlife in Pakistan. Government of Pakistan has been neglecting this sector and even providing licenses to hunters for hunting the species.

However, in 2015 government of Pakistan made efforts to improve wildlife. It has imported white lions from Africa and trying to expand its species which are present to improve and expand wildlife.

Pakistan; Government has made new sectors for the improvement; it has made new sectors in Baluchistan (Khuzdar), Sindh (Karachi), and Punjab (Bahawalpur).

One of the most famous projects was the Himalayan jungle project (HJP), which was worked in 1991 with local communities in Palas valley situated in two districts Kohistan and Battagram of KPK. Pakistan is improving the wild life.

If you live long enough, you'll make mistakes. But if you learn from them, you'll be a better person. It's how you handle adversity, not how it affects you. The main thing is never quit, never quit, never quit.

— William J. Clinton

Money

Muzzamil Khalid
PJC

How many times have you thought to yourself I wish I had more money? Your mind wanders thinking of all the world's delights you could treat your self to cars, exotic holidays both spring into your head. Perhaps you don't want millions of pounds. But just a few thousands to pay off the debts, which many of us seem to have run up in this consumer- saturated society. People imagine they will be happier like the rich and famous. Are they really happier?

Do you need money to be successful? How do you know when strike a deal worth millions which offers you financial security or is when you are content with yourself? When you win the lottery, have you succeeded or have you just been lucky? Every body wants that little bit more money. But money isn't always the answer. Money can make you too materialistic to appreciate your family. Many families are too busy with their latest

purchases of computer games and cars. They may have succeeded from a materialistic view point, but what about spending time with their families? Greed always plays a part in money and success. When people have money, they often change and see themselves as superior or of a higher social class, just because they have money in their pockets. On the surface they seem content with life, but the reality may be different. Many studies have shown that people with wealth are not always happy. Famous people who have made millions, frequently suffer from depression and loneliness and ruin their health with drugs. There are some things that money cannot buy; family, friends cure for a fatal illness and love. As long as you have enough money for goods, food and shelter, you could be the happier person in the world. Family and friend give love, help, encouragement and simile that is beyond point.

If you live long enough, you'll make mistakes. But if you learn from them, you'll be a better person. It's how you handle adversity, not how it affects you. The main thing is never quit, never quit, never quit.

- William J. Clinton

Where Are You Now?

Muhammad Hammad Bashir
XII A

A mother and baby camel were lazing around, and suddenly the baby camel asked...

Baby: Mother, mother may I ask you some questions?

Mother: Sure! Why son, is there something bothering you?

Baby: Why do camels have humps?

Mother: Well son, we are desert animals, we need the humps to store water and we are known to survive without water.

Baby: Okay, then why our legs long and our feet rounded??

Mother: So obviously they are meant for walking in the desert, you know with these legs I can move around the desert better than anyone else! Said the mother proudly.

Baby: Okay then why are our eyelashes long? Sometimes it bothers my sight.

Mother: My son those long eyebrows are your protective cover. They help to protect your eyes from the desert sand and wind. Said mother camel with eyes rimming with pride...

Baby: I see. So the hump is to store water when we are in the desert, the legs are for walking through the desert and these eyelashes protect my eyes from the desert...

Then what the hell are we doing here in the ZOO!!!!!!???

Moral of the story: Skills, knowledge's, abilities and experiences are only useful if you are at the right place.

If you live long enough, you'll make mistakes. But if you learn from them, you'll be a better person. It's how you handle adversity, not how it affects you. The main thing is never quit, never quit, never quit.

- William J. Clinton

The Fantasy of Reading Books

M. Sohail Khan
2nd Year B

“Books are more than books, they are the life. They are heart and core of ages past, the reason why men lived, worked and died, the essence and quintessence of their lives”. (Any Lowell)

Books are the great source of acquiring knowledge. They have been called a Man’s best friends. Their wealth of knowledge is open to anyone who reads them.

Books are a source of increasing the power of the intellect. Ruskin called books “Kings’ Treasures” not the treasure of gold, silver or pearls, but the immortal treasure of knowledge and wisdom. Similarly, Southey discovered his best company in books:

“My days among the dead are passed, around me I behold, where the casual eyes are cast,

The mighty minds of old:

My never failing friends are they, with whom I converse day by day”.

Books are our forever friends and guides. They lead those who are strayed and cheer up those who are melancholic. In other words books are a source of eternal joy and pleasure.

“All good books alike in that they are truer than if they had really happen and after you are finished reading one. You will feel that all that happened (in the book) and afterwards, it all belongs to you; the good and the bad, the ecstasy, the remorse and sorrow, the people and the places and how the weather was”. (Ernest Hemingway)

The selection of books is a very serious problem. A good book leaves its print on the mind of its reader, whereas a bad book kills the moral characters of its reader. The best and the most suitable book for the students are biographies, histories, religious books and the books about science and technology. Novels, like Harry Potter also play a vital role in improving vocabulary, and learning the proper sentence structure. Ever since the appearance of the novel in the 18th century there has been the desire of reading them. The first and most obvious use of novel – reading is amusement or recreation. Novel reading relaxes a tired brain and an exhausted body. The world in the novels is more beautiful than the reality, and this beauty soothes one’s mind and by. Body visualizing every scene of the novel, we can become part of the imaginative world created in novels.

Thus books provide us escape from the cares of life Thomas kempis has rightly said about this:

“Everywhere I have sought rest and not found it and except sitting in a corner by myself with a little book”.

They give new view to life and teach us how to live. They soothe the grieved, the stubborn they chastise.

Fools they admonish and confirm the wise; their aid they yield to all, they never shun. The man of sorrow, nor the wretch undone.

“A good book is precious life blood of a master spirit”. (John Milton)

Teacher as a leader

Syed Khizar Ali Shah
2nd Year B

Everyone is aware of the fact, that youth of today is the leader of tomorrow. This future leader passes through the most crucial stage of his/her grooming under the guidance of teachers. A young child is like clay in the teacher's hand. The duty of the teacher is not only to communicate the facts given in the books, but also to impart the knowledge of moral values, which would help and guide the child throughout his/her life. These values create confidence, a spirit of giving, sharing and of sacrificing personal interests for a good cause. A teacher motivates, inspires and guides the students and makes them worthy members of the society. This goes a long way in nation – building.

A teacher has to play cardinal role in forming the coming generations of a country. The role of a teacher can be compared to that of a Prophet. Every Prophet was essentially a teacher. This profession is so important and sacred that the Holy Prophet (SAW) proudly declared it to be a prominent part of his Prophet hood. If a teacher realizes the significance of his job, the tremendous responsibility he is shouldering, the share he has in future development of the nation, and consequently the accountability he will have to face in the hereafter, he will at once shudder with the idea of grave consequences of any dereliction on his part. No personality can have an influence more profound than that of a teacher. The students

are deeply affected by the teacher's affection, his character, his competence and his moral commitment. A popular teacher may become a model for his students. The students try to follow their teachers in their manners, etiquettes, style of conversation and get up. Their teacher is their ideal. He can lead them anywhere.

In Muslim history, teachers have not only distinguished themselves by their profundity in knowledge, but also because of their character, piety and abstinence from immoral acts. In civilized societies, the teachers are held in high esteem as they produce the cream of a nation which chalk out the destiny of a country.

Thus the basic philosophy of a teacher should be to touch the lives of those whom he encounters in some positive way. When taking on the role of a leader, a teacher's impact becomes far greater and more significant. Therefore, this role must always be accepted with an understanding and a consciousness. The children must be inspired to do their best, instilling a strong sense of values, a desire to learn new things and the ability to meet the new challenges must always be encouraged. I conclude with the words of Henry B. Adams:

“A teacher affects eternity; he can never tell where his influence stops”.

The Battle for Pakistan

Mahad Ajaz
2nd Year D

Unprecedented successes in NWA are reflective of the professional acumen of Pakistan Military. Whole Pakistani nation stands with our valiant armed forces and are proud of the lionhearted officers and men in uniform who are fighting audaciously and courageously to eliminate the terrorists. Effects of the (Alhamdulillah) successfully on going operation are quite visible as terrorists are on the run. Many of them have surrendered, some are ready to discontinue activities against the state, and some are trying to take refuge in cowardly acts like attacking women and children.

Pakistan is fighting a war against the menace of terrorism for over a decade now. Our society has suffered hugely due to the worst security situation in addition to the loss of image at international arena.

North Waziristan Agency is among the seven Agencies of Federally administered tribal Areas” (Fata), established 1892, with its headquarter in Miran Shah. Unfortunately, over time, NWA had become the hub of terrorists to restore to peace and

policy of reconciliation by the government; but failed every time.

Eventually, as a last resort and on direction of government, Chief of Army staff Raheel Sharif set full-fledged operation against the militants. Operation Zarb- e – Azab was launched to target all terrorists outlets without any discrimination, local and foreign, hiding in the sanctuaries in NWA. On June 15, 2014 operation Zarb – e – Azab commenced with full force, enthusiasm and determination to uproot the terrorism. Operation Zarb - e - Azab was planned to be concluded in four stages. Strangulation, clearance, rebuilding and hand over control to civil administration. First phase has been completed successfully and second phase is underway.

Army backed by the nation, is all set to eliminate every terrorist on this soil. While the operation Zarb - e - Azab continues on ground, we all should realize that it is not merely an operation. It is rather a commitment to cleanse Pakistan of the scourge of terrorism once and for all. As the armed forces are engaged in defeating terrorists, we the citizens of Pakistan, share a responsibility to transform the mindset that stems terrorism.

Martyrs of 1965 War

Shazif Ali
2nd Year B

On the 6th of September, in 1965, our country, which was but 18 years old found itself face to face with an extremely challenging situation when war broke out with India. For the people of the country it was a huge shock. They weren't exactly expecting this, at least not by 6th September. Whether it really was the surprise attack as we have heard and read or not is another issue and we aren't discussing that strategic history now, this is to refresh the memories of those 17 days, the days when countless young men in uniform wrote blood warning, pulse racing tales of valour and mad bravery, the days when perhaps for the first and so far the last time the nation was actually ONE! All this showed the enemy that the nation may be poor on resources but is fully able and mature to defend its boundaries. Thanks to the brave breed of Pakistani warriors.

The war took place in the light of tension and occasional battles in the Runn of Kuchh desert in Sindh area, which was apparently wrapped up by early 1965, but right after that tensions erupted in the ever contentious, ever turbulent Kashmir areas. Both countries were in dialogue over the tense situation and both forces were ready for all out war.

In spite of fierce battles in various areas throughout the border particularly in Kashmir, ruled out all out war, but all out war nevertheless broke out.

Indian army had to face very strong resistance in the Lahore area during the first few hours and

today it seems if they had managed to cross over that day, the outcome of the war may have been much different. So huge credit goes to the regiments, units and above all men who were deployed in the Lahore area of Wahgah, Burki etc

Those were the men, who saved our land and I wish I could pay tribute to all, each and every Shaheed and ghazi but it is impossible. A few faces from the 1965 war, whom we salute to symbolize our love for those men in uniform are:

Major Raja Aziz Bhatti Shaheed (Nishan-i-Haider)

Born 1928 in Hong Kong, Commissioned into Punjab Regiment, 1950. On 6th Sep 1965 as company commander in the Burki area of Lahore sector, Major Bhatti chose to move forward with his platoon under incessant artillery and tank attacks for five days and nights in the defense of the strategic BRB canal. Throughout, undaunted by constant fire from enemy, shell arms, tanks and artillery, he organized the defense of the canal, directing his men to answer the fire until he was hit by an enemy tank shell which killed him on 10th September 1965. He was 37 years old.

Squadron Leader Sarfraz Rafiqui Shaheed (Sitara-e-Jurat)

On 6th September 1965, Squadron Leader Sarfraz Rafiqui led a formation of 3 F-86 aircraft

on a strike against Halwara airfield. The formation was intercepted by about 10 Hunter aircrafts out of which Sarfraz took out one in a few seconds. But then his guns jammed and stopped firing but until he refused to leave the battle area which he would have been perfectly justified to do and provided as much protection to his formation as possible with an unarmed aircraft. His aircraft was shot down and he was killed but he also managed to take down 3 more hunter aircrafts by his formation.

Flt Lt Yunus Hussain Shaheed (Sitara-e-Jurat)

Flight lieutenant Yunus Hussain fought in air battles aggressively, fearlessly and with great

professional skill. During one such engagement, he fought singly against 6 enemy aircrafts, and shot down 2 Hunters. Though his own aircraft was damaged in this encounter, he managed to bring it back to base safely. On 6th September, while attacking Halwara airfield, his small formation was intercepted by a large number of enemy, and although his aircraft was hit, he refused to break off the engagement, in complete disregard of personal safety, and was reported missing from the mission. He becomes the symbol of courage and professional ability for other pilots. For his gallantry, valour, professional skill and devotion to duty, he is rewarded Sitara-i-Jurat.

Time Waits For No One

Muhammad Hammad Bashir XII A

To realize the value of a sister, Ask someone who doesn't have one.

To realize the value of 10 years: Ask a newly divorced couple.

To realize the value of 4 years, Ask a graduate

To realize the value of one year, Ask a student who has failed in the final exam.

To realize the value of 9 months, Ask a mother who has given birth to premature baby.

To realize the value of one week, Ask the editor of weekly newspaper

To realize the value of one hour, Ask the lovers who are waiting to meet.

To realize the value of one minute, Ask a person who has missed the train, bus or plane.

To realize the value of one second, Ask a person who has survived an accident.

To realize the value of millisecond, ask the person who has won a silver medal in Olympics.

To realize the value of a friend, lose one.

Time waits for no one. Treasure every moment you have. You will treasure it even more when you can share it with someone special.

Earthquake of October 2005

Mudassar Javed
1st Year

This was a very pleasant morning. Everyone was at routine work. Students were in school, shopkeepers were opening their shops, offices were just to re-open, mothers after sending their kids to schools had started to clean their kitchens. Some of them even started preparation of lunch. All of a sudden, the earth starting jolting and everyone was witnessing a horrible scene of their life. It was a devastating earthquake. Everything lying on the earth started moving and crawling. Shelves full of books started falling down, crockery and windows nicely placed in the cupboard and racks, one after another, started moving and turning into pieces. Their noise had further created panic among all, especially the housewives and peoples who were left in home.

Everyone who was standing in the room, or on the road tried his/ her best to move to safer place, but they felt that earth is shaking and they were losing grip of their foot, their legs were unable to move, and the speed of jolts were increasing with fast note. People thought that dooms day has come and then there were noises of crying coming from everywhere. Students stated to rush from classrooms to the grounds, leaving their books open, pushing each other and jumping on their fellows.

Their parents from homes and office started running to schools to enquire about the safety of their loved ones. Failing to find any means of conveyance on roads, they began running like a

marathon to reach the schools, and the long journey they covered in minutes. Every body was trying to find their kids. While kids, after witnessing the worst incident of their life, were frightened and senseless. Teachers were trying to console them and helping the parents to find their kiths and kin's.

Few minutes later, I saw whistle blowing ambulance, carried the injured and dead peoples to Ayub Medical Complex and then there was no other vehicle on road but ambulances which started pouring from Mansehra, Balakot and other parts of Hazara division, as Ayub Medical complex is the largest hospital of the territory.

We, the friends and volunteers with family members, after the announcements made in the Mosques for the help of earthquake affected people, started collecting household goods. One thing I will never forget is that in a matter of minutes, we were able to collect blankets, crockery, bottles, packs of juices and food items which we handed over to the NGO's working in the city.

This was 2nd or 3rd day, when the main Abbottabad – Mansehra road was chocked with vehicles loaded with the relief goods. Everyone was desperate to reach Balakot, the most affected area. I saw ladies in cars loaded with bread and juices trying to move faster to deliver food to the affected people. In Mansehra, trucks loaded with tents, medicine, and other necessary items, were moving like turtles and touching bumper. I saw students

of Karachi University. Female doctors taking all luggages on their shoulders. Some people told that they had no clothes to wear but had brought medicine from Karachi. This was just amazing to see the entire country converted to Abbottabad for help.

Aid from all over the world started to arrive, and then a day came when I could see latest helicopters from US, UK, Germany, Russia Cuba and countless others. Sky was full of fleet of helicopters. They were hovering around like pigeons, working round the clock, relocating the injured dead bodies and providing food and other relief goods.

I could also see teams of doctors came from the other parts of the country and even from all over the world; Cuban, Korean, Chinese, Turkish and many more. They all showed a commitment that I have no words to appraise and appreciate.

My father told me that they had seen the nation united like this only once before, and that was during the war against India in 1965. This was the second time that entire nation was standing like a well knitted thread. Working together, regardless of cast, color, region and religion, on a single point agenda and that was how to help their countrymen.

I can without any doubt say that despite all the loss brought by that earthquake, there was also a blessing in disguise, and it was the unity which has brought the entire country to one platform.

And now, it is the time to show that kind of unity once again. We as a nation must stand with Pak army to support the fight against terrorism. We can do this by providing moral support to Pak Army on every platform, as well as educating the people. No doubt, our country is going to be a heaven on the earth, once again In Sha Allah!

Pakistan's Wild Life

M. Hunanin
10th F

Food is necessary for our body. Similarly, we also need food for our mind. The best food for the mind is reading books. Reading gives us joy and we forget the cares and worries of life. When we are alone, books are our best friends. They entertain us in our spare moments. Books on poetry and short stories give great enjoyment.

If we are in cheerful mood, our joy is increased with reading books. When we are in a depressed

mood, books console and soothe our troubled mind. Books provide us with the best advice and guidance in our difficulties.

Reading books gives us information about the world around us. This gives us great pleasure. Indeed books are our best friends as they help us in our need.

Seven most common dreams And what they mean

M. Waqar Azim
2nd Year B

Falling: This dream usually highlights the loss of emotional control in the real life of the dreamer. Finally can represent insecurity, a lack of confidence or a fear of failure. There is also a literal interpretation, the dreamer may have sub-consciously noticed something unsafe in the house such as a loose stain rail or a window that is not locked. Thus such dreams may serve as a warning as well.

Being chased: This metaphor for insecurity, which may be closing on the dreamer. This dream can also indicate feelings of guilt, and the dreamer might be afraid of being caught for something done in the past.

Car Crash: Night mares of this type reveal deep anxiety. A car crash can often symbolize the threat of an emotional crash.

Buildings: the upstairs of the building represent the dreamer's conscious mind and the hidden self. Decayed or crumbling buildings indicate that the dreamer's self- image has suffered. Also, different parts of a house may symbolize different times.

Modern rooms may represent the conscious mind and the old fashioned, the unconscious mind. A building can also represent the dreamer's physical health, with decayed building being a warning of the onset of illness.

Being partially dressed in Public: One of the known anxiety dreams, it symbolizes that the dreamer is not properly dressed for what lies ahead.

Finding treasure: Digging up buried treasure symbolizes rediscovering a part of self that the dreamer has ignored or that has been submerged along the way, such dreamers may symbolize other things too, such as power, independence or security, or they may highlight the need for examining life, once again to find the opportunities hidden just below the surface.

Flying: Such dreams are usually accompanied by the feelings of intense exhibition. Flying usually feels completely natural, as if the dreamer has always known how to do it. Sometimes flying is used to escape from situation in a dream. Thus, flying might symbolize liberation from problems.

“We Pakistanis as a nation” Formation of Pakistani Nation

Ehsanuallah Awan
2nd Year B

After the war of independence in 1857, Muslims were extremely hated by the British rulers. Britishers hated us because during war of independence, Hindus deceived us and joined the Britishers. They crushed the Muslims for many years, but after a very long time, Muslims were awarded with the blessings of Allah almighty in the form of Allama Muhammad Iqbal and Quaid-e-Azam.

The 1930, a great poet, Allama Iqbal addressed the Muslims in Allahabad and gave the idea of separate homeland for the Muslims. After his address, the campaign of freedom started to reach at its peak. The Muslims of subcontinent who were illiterate and tangled in the chain of slavery, broke the chain of slavery and rose their voice for their freedom.

Muslims started fighting for their freedom under the leadership of Quaid-e-Azam. So whole of the nation fought under the leadership of Quaid-e-Azam and gave many sacrifices and lost almost everything and after that they succeeded for their dreams in 1947 and rose in the world with the identity of Pakistanis and thus is called Pakistani nation.

Pakistani nation after the independence:- when Pakistan got the freedom from the British rule and cruelty of Hindus, Pakistan had challenges and difficulties but the people were full of passion that they could do everything for the great country. At that time, Quaid-e-Azam gave many advices to

the nation and people were dying to follow that advice. Some of the advices are given below:-

1) Ones Quaid-e-Azam address to students and said

“My young friends, I look forward to you as the real makers of Pakistan, do not be exploited and do not be misled. Create amongst yourself complete unity and solidarity. Set an example of what youth can do. Your main occupation should be in fairness to yourself, to your parents, in fairness to the state, to devote your attention to your studies. If you fritter away your energies now, you will always regret”

2) Another place Quaid-e-Azam advised his people to “serve Pakistan with honest and selfless devotion he also advised them to get education and build character. Pakistan can only prosper and grow stronger if we act upon these thing”.

At that time everything (by the public side) was in a proper way. Everyone wanted to serve the country with full zeal and zest. But with the passage of time Pakistanis lower their passion and zeal but not at the level of disgrace.

In 1960 “PIA” was the best airline of the world. Pakistan had created their own setup. In 1965 Indo-Pak war broke out. That was the war when people forgot all their differences and got unite together like one Pakistan and took a victory over India that will be remembered over the decades InshAllah! As we know that the base of

Pakistan is Islam, so that is why Pakistan not only tries to maintain itself, but always rises his voice against the cruelty on the Muslims of the world. There are many events about the love of Pakistanis for the other Muslims of the World, which are witnessed by the world.

In 1967, just after 2 years of Indo- Pak war, Israel attack on the Arab countries. First Israel did air strikes on the Egypt and in result Egyptian air force was almost destroyed. At that time Israel also attacked on other Arab countries e.g. Syria, Jordon. At that time Israel was easily winning the war but then some “PAF” pilots went there and used the Arabian jet fighters and destroyed twelve (12) jet fighters of Israels and in return there was no harm to the “PAF” pilots. However Israel won the war, but Pakistan saved Arab countries from a big loss with the help of Allah mighty.

Apart from the military, Pakistan was also growing in many other fields. In the field of science Pakistan also contributed. In 1979 a Pakistani scientist “Dr Abdus Salam” won a noble prize for the Pakistan in the Field of Physics. At that time, Pakistan was progressing so rapidly that many countries said that one day Pakistan will be a super power.

Pakistani Nation nowadays:- Well! I am feeling really bad to say that now days we “Pakistani nation” is almost ruined. There is “Pakistani thing” left in us. We ruined every thing of us. We forgot

our culture and adopted the shameful culture of western countries. We “Pakistanis” now take part in every evil. We are now corrupt. We are now over populated. We are now not only Muslims but are divided into Shia, Sunni and many other sects. Now we are coping the western world but forget our own identity. We are dishonest people. We are deceivers. We are liars. We lost the shame in our eyes. Now we are dependent not independent. We are relying on help from other countries. We are not relying on Allah almighty and our resources that Allah gives us. We are just destroying our resources. In short we are totally drowned into the dark of downfall. Our main and the biggest mistake is that we don't identify our own mistakes but always criticize and blame the government for everything. I think our government is not from America or India or some other country, it is among us. Today's government is the reflection of our own character. If we say that our government is selfish then I think we are forgetting that we are dying to purchase the latest iphone but we are forgetting that someone is dying due to hunger in our neighbours. I know that I criticized our self a lot but this is our reality and reality can't be changed unless we face the reality. I would like to end my essay with a hope that InshAllah Allah mighty will give strength to us to bring positive changes in ourselves so that we can change the entire conditions of Pakistan.

“PAKISTAN ZINDABAD”

The Importance of Physics to Man and the Society

Ehsanuallah Awan

2nd Year B

INTRODUCTION:

Physics - the study of matter, energy and their interactions - is an international enterprise, which plays a key role in the future progress of humankind. The support of physics education and research in all countries is important because: physics is an exciting intellectual adventure that inspires young people and expands the frontiers of our knowledge about nature.

Physics is the most basic of the physical sciences. From chemistry and geology through to biology and cosmology, we understand science in terms of the concepts developed in physics. Not only this, but many of the tools on which the advances of science and technology depend are direct products of physics.

The interests and concerns of physicists have always formed the basis of future technology. In medicine we use X-rays, radioisotope and nuclear magnetic resonance imaging. In addition, laser, electron microscopes, synchrotron radiation, and electronics all depend on advances made in physics. Where would our modern western economies be without computers?—we could not build the electronics that modern computers rely on without a knowledge of quantum mechanics. Our modern world is much more connected than in previous historical times. These days we travel far, communicate easily and quickly, and conduct business around the world effortlessly. In fact almost no place on earth has been excluded from the modern interconnected world.

We are not only connected with physics through modern technology we are connected at a much more basic level through mother nature. The tsunami in Sumatra Indonesia is a prime example. Not only was it catastrophic for the local area the laws of physics saw this tsunami travel across the Indian Ocean killing over 300,000 in Southeast Asia, and traveling through more than 30 other countries resulting in more than 500 deaths. This was the law of physics in action. But as much proof as there is that physics has played an important role in the connectivity of all parts of the planet the world is still a much divided place. In developed countries you see an almost 100% literacy rate and a \$30,000 mean capital income, and a life expectancy of 80. While in developing nations you see a literacy rate lower than 50% and a mean capital income that's around \$2000, and a life expectancy of 40. There is much more for physics, the scientific world, and governments to do to create equality with that interactivity.

Ban ki moon the UN Secretary General has been quick to point out the ongoing tragedies throughout the developing world that are directly tied to disease, poverty, and the degradation of the environment. He is also quick to point out that the lack of access to physics and other sciences as well as technology has attributed to many of these problems.

Sadly the scientific community spends most of its time working on solutions for the developed world yet most of the population on earth can be found in nations that are developing.

Physics has the capability of playing a major role in finding solutions to many of the problems facing the human race. Of course it does not have all the answers but the science is developed enough to have created nuclear weapons which remain a global threat, then surely it can be used for the betterment of all people around the globe.

Of course politics, socio-economic factors, and acceptance by the people all play a role in the development of a nation. But physics, engineering, and other technological and scientific feats can transform a developing nation to a developed nation. Just look at what the role of physics has accomplished in just the past 200 years. Physics can play an important role in developing strategies to combat climate change, in the development of cleaner energies, and in the development of technological advancements. Then why is it that developing nations spend such a small portion of the GDP on research and development in these areas? Is it because the benefits of science and physics specifically are not fully recognized in industrialized and developing nations? Is it that they really do not want to face the idea that our world is in desperate need of change to ensure we do not destroy ourselves? Physics and technology must work together to resolve the need for new technologies that will decrease the damage to our planet, for strategies to ensure that the people of developing countries have the tools to progress, the need for solutions to deadly diseases that remain a threat, and the need for solutions to the increasing demands we place on our resources before they are depleted. The role of physics in our modern world is more important than in any other time in history.

THE IMPORTANCE OF PHYSICS TO SOCIETY

Physics generates fundamental knowledge needed for the future technological advances that will continue to drive the economic engines of the world.

Physics contributes to the technological infrastructure and provides trained personnel needed to take advantage of scientific advances and discoveries. Physics is an important element in the education of chemists, engineers and computer scientists, as well as practitioners of the other physical and biomedical sciences.

Physics extends and enhances our understanding of other disciplines, such as the earth, agricultural, chemical, biological, and environmental sciences, plus astrophysics and cosmology - subjects of substantial importance to all peoples of the world. Physics improves our quality of life by providing the basic understanding necessary for developing new instrumentation and techniques for medical applications, such as computer tomography, magnetic resonance imaging, positron emission tomography, ultrasonic imaging, and laser surgery.

THE IMPORTANCE OF PHYSICS TO MAN

Physics is important to man's life because it is used in Cooking food, Cleaning clothes, Watching TV, Heating your house, Playing sports Everything else in your life:

- Physics plays an important role in health
- Economic development
- Education
- Energy and
- The environment.

Physics has had an increasingly important impact on the average person's daily life. For example, Physicists played an essential role in the development of:

The Transistor-: The basis of all modern electronics, including radio, television, computers, and telecommunications. The Laser And Laser Diodes: Now used widely in CD players,

grocery bar code scanners medical treatment, and telecommunications.

The Digital Computer--much of the early development (and some of the most recent) have been motivated by basic research. Fiber Optics: Now finding widespread application in high-speed data and voice transmission networks. The Global Positioning System: Uses satellites and precise timing to allow positions to be allocated to within a few feet anywhere on the surface of the earth. The Hologram: Uses on credit card, driver's licenses, and other documents to prevent fraud. The World Wide Web (W.W.W)--originally designed by physicist for one to be able to access the world. Medical Imaging Techniques: Such as the sonogram, the CAT scan, and Magnetic Resonance Imaging (MRIs). Medical Treatment Techniques: Using radiation and charged particle accelerators.

New Micro-Sensors: For "smart machines" and "smart buildings," faster and smaller computers, computer disks that can store information in a smaller space, improved chemical processing to help the environment and reduce energy use, faster and cheaper telecommunications.

THE FOLLOWING ARE THE VARIOUS IMPORTANCES OF PHYSICS TO MAN AND THE SOCIETY

Physics Improves Health;

In medical technology, positron emission tomography (PET) Lets neurologists see how energy flows inside the brain to see where problems could be occurring.

Physics Connects the World;

The telecommunications industry, including the development of the internet, has benefited from physics research in telecommunications from radio waves to fiber optic cable.

Physics Improves Technology; The computing industry depends on physics research in semiconductors and magnetism in order to build processors and disk ever smaller and denser.

Physics Drives Progress; Physics research benefits the transportation industry in everything from what materials to build cars of to how to build efficient engines to navigating using the global positioning system.

Physics Clears the Air; Physics is used in environmental science to both detect problems and to build systems that are better for the environment with technologies such as solar power and plasma physics.

Physics Fills the Home; Many consumer goods developed from physics research. CDs are possible because of refinements in laser technology. Many household gadgets have microprocessors such as microwaves and phones.

Physics Designs the Future; Research in materials physics has led to many innovations in the substances from which products are made. One now-common material is Teflon®. Other substances are now used to make many items from sports equipment to earthquake-resistant buildings.

PHYSICS LUNCHES NEW BUSINESS;

The defense department started the Global Positioning System (GPS), which uses 24 satellites. GPS was possible because of the atomic clock. Now GPS technology has many uses from being in road maps in cars to perceiving shifts in the tectonic plates.

PHYSICS IS THE MOST FUNDAMENTAL OF THE SCIENCES;

It is concerned with the most basic building blocks of all things - from ants to antennas, from

quarks to quasars. The study of physics means trying to find out what the universe is made of, and how these things move and interact with each other. So in one sense, all the other sciences are built on the knowledge gained through the study of physics.

PHYSICS IS BEAUTIFUL;

Physicists love simplicity. They are constantly striving to find the most fundamental ideas that can be used to describe even the most complex of phenomena. For example Newton found that only a very small number of concepts could be used to describe just about all of the mechanical world - from steam engines to the motion of the planets. Not only is this beautiful, it's downright amazing!

PHYSICS TEACHES YOU TO THINK;

This might seem like a strange statement. The study of all subjects teach you to think. But because physics deals with the most basic concepts, the application of such techniques as "Separation of Variables" and "The Scientific Method" are never more clear than they are in the study of physics. Once mastered you will find that these methods can be applied to all subjects, including the business world and just coping with everyday life.

PHYSICS GIVES YOU A NEW APPRECIATION OF THE WORLD AROUND YOU;

You can look a rainbow and say "Wow, pretty colors!"; or you can marvel at the amazing interactions between photons and electrons that come together in that particular way when light from the sun strikes spherical water droplets in the sky, and that you perceive as a multicolored arc suspended in the air. Now that's awe!

PHYSICS IS FUN;

Lastly, studying physics gives you the opportunity of playing with a lot of really cool toys!

IN ADDITION:

Many pioneers in molecular biology were trained as physicists e.g. Francis Crick, one of the two discoverers of DNA. A large number of astronomers were also trained as physicist. Without physics, cars wouldn't have being developed to take us to our various destinations. TV's, Light will not have been invented. We would not have known about space, Computer Games, How water boils, Model financial Market, Shape futuristic buildings and structures.

SUMMARY & CONCLUSION

Physics is a creative subject, the concepts of physics don't come easily. Someone has to come up with a theory to begin with. This is just as much a creative process as composing music. But where physics, and science in general, differ from the Arts is that no one will accept your theory unless you have some way of testing its validity. Experimental physicists sometimes have to be enormously creative in coming up with methods of testing theories and measuring things in the world around them. For example, how do you tell that there is a planet orbiting a star that is so far away that it appears as nothing more than a spec of light in even the most powerful telescopes?

In summary, for all these reasons, physics is an essential part of the educational system and of an advanced society. We therefore urge the government to seek advice from physicists and other scientists on matters of science policy, and to be supportive of the science of Physics. Muhammad Ibrar Tanoli Lecturer in Physics HM SKS House.

Following The Footsteps Of Morco Polo (Travelogue of China)

Ehsanuallah Awan
2nd Year B

Official Name	People's Republic of China
Capital	Beijing
Largest city	Shanghai
Official languages	Standard Chinese (Mandarin)
President	Xi Jinping
Premier	Li Keqiang
Legislature	National People's Congress
Area	9,596,961 km ²
Population	1,376,049,000 (2015)
GDP	\$20.853 trillion (1st)
Per capita	\$15,095 (83rd)
Currency	Renminbi (yuan; ¥) (CNY)
Time zone	China Standard Time (UTC+8)

China, officially the **People's Republic of China (PRC)**, is a sovereign state in East Asia. With a population of over 1.381 billion, it is the world's most populous state. The state is governed by the Communist Party of China. It exercises jurisdiction over 22 provinces, five autonomous regions, four direct-controlled municipalities (Beijing, Tianjin, Shanghai, and Chongqing), two mostly self-governing special administrative regions (Hong Kong and Macau), and claims sovereignty over Taiwan. China is a great power and a major regional power within Asia, and has been As a child, I used to be continuously keen on the stories of marvelous travellers such as Ibne-Batuta and Marco Polo, who explores central Asia and China, My childhood dream came into reality, once this summer I got the visa of rising world power-enriched with culture and tradition - China.

Thai Air Lines took me to my first destination, Bangkok, an amazingly diverse and beautiful

city. I had a short stay of just 3 hours and then took another flight of Air Bus A380 of Thai Air to Shanghai, I reached Shanghai in the evening and from Airport I took Subway and went straight to my hotel room. Staying there for 5 days, I had been to these exotic places.

While on Transit at Bangkok Airport

People Enjoying Early Morning Exercise on Nanjing Road

Shanghai Nanjing Road

Nanjing Road is a walking street that is always packed with people watching other people. It is regarded as the first commercial road in Shanghai.

People's Square Shanghai

The 5.5-km long Nanjing Road is the most bustling and prosperous street in Shanghai. Extending from the Bund to Jing An Temple, its eastern end has an all-weather pedestrian street. The modern shopping malls, theaters, and international hotels have mushroomed on both sides of the street.

People's Square

Peoples square is located in the center of Shanghai, surrounded by the municipal

Enjoying the cool breeze at Bund Shanghai

government office building, the Shanghai Museum, Shanghai Exhibition Hall and the Grand Theatre. There are a huge green area and trees, encircled by buildings on all sides.

The Square is particularly spectacular at night, when steam appears to seep out of the roof of the museum and the light bounces off the glass walls of the Grand Theatre.

The Bund

The Bund (Waitan) is one of the most noted architectural symbols of Shanghai.

The Bund, or the waterfront, is now surrounded by about 50 various buildings of different architectural styles including Gothic, Baroque, Romanesque, Classicism and the Renaissance

Along the Serene Huangpu River

Cruising on Huangpu River

Huangpu River winds about 114 kilometers from Dingshan Lake, where it meets with the Yangtze River. 40 km of the river is within the area of the big Shanghai. It is only about 400 meter wide

With Statue of Walt Disney in Shanghai Disney Land

and 9 meter deep, but it holds about one third of the China's total international trade It supplies water to the 13 million people in the metropolis and is also important for navigation, fishery, tourism and receiving wastewater.

With Statue of Walt Disney in Shanghai Disney Land Shanghai Disney Resort

Shanghai Disney Resort is a themed resort in Pudong. It is the first Disney park resort in mainland China. The resort features Shanghai Disneyland Park, an entertainment district, two themed hotels, recreational facilities, a lake and associated parking and transportation hubs. Some

The Majestic Tiananmen Square Beijing

of the star attraction of Disney World of Shanghai are Camp Discovery, Disney Jungle Characters at happy circle, Roaring Rapids, Soaring over the Horizon, Alice in Wonderland maze, Disney Princess at Enchanted storybook Castle, Hunny Pot Spin, Peter Pan's flight, Seven dwarf Mine train, the pirates of Caribbean & Meet Mickey at the gardens of Imagination.

After this exuberant trip of Shanghai I packed my luggage for Beijing, Beijing is an old capital city developing at a fast pace. This journey was life time experience as I boarded on the Bullet Train ever first in my life. It was quite a joyful experience just covering distance of 1380km in four and a half hours from Shanghai to Beijing. Beijing is a unique

The mystical Forbidden City

place infused with old and modern civilizations. Here is a snapshot of worth seeing places of Beijing.

Forbidden City (the Imperial Palace)

The Forbidden City is the ideal place to begin exploration of Beijing by opening its mysterious face. With over 9,000 rooms and over 250 acres, this large palace building was built between 1406 and 1420. It burned down and was rebuilt, sacked and renovated for times, so most of the architecture you can see today dates back to the 18th century in the Qing Dynasty.

Tiananmen Square

Tiananmen Square is the most representative place in Beijing. Lying in the heart of Beijing City,

The Majestic Tiananmen Square Beijing

Peace and Tranquility in Temple of Heaven

it is the place for massive parades and gathering. It is one of the largest square of such kind in the world. This was the place when in 1949 Chairman Mao announced the establishment of the People's Republic of China. Tiananmen Square is circled by Gate of Heaven on its north; the Great Hall of the People on its west, on the east lies the National Museum of China, there are Monument to the People's Heroes and Chairman Mao's Mausoleum on the south.

At sunrise and sunset the raising and lowering ceremony of the Chinese National Flag is well worth seeing

Great Wall of China at Badaling

The Great Wall of China is among the seven wonders of the world. The Great Wall is a series of fortifications made of stone, brick, wood, and

Devotees burning incense in Lama Temple

other materials, generally built along the historical northern borders of China to protect the Chinese states and empires against the raids and invasions of the various nomadic groups. Climbing the Great Wall is the first and foremost attraction of Beijing, and a must for all the tourists visiting china, In Beijing there are mainly eight sections of the Great Wall crossing the northern part of Beijing. Most of the sections of the Great Wall in Beijing are well-preserved and mainly the relics dating from the Ming Dynasty,(the time for huge construction).

Regarded as the largest imperial garden in China, Beijing's Summer Palace is in fact a

Beijing Olympic Park

park-styled royal retreat extending out over 10 square miles in Beijing . Once a summer resort for emperors palace is still a retreat for visitors, who can take a rest here or wander around old pavilions, buildings, temples, bridges and the huge lake - Kunming Lake. It is a royal garden most completely preserved with richest landscapes and large compact buildings

Temple of Heaven (Tiantan)

Temple of Heaven is one of the real highlights of Beijing. It is situated in the southern Beijing City. It has been one of the most sacred sites for the whole country for the past five centuries. It worked

as sacrificial buildings for the Ming and Qing emperors. The most unique part of the temple is the century-old trees - row upon row of Chinese cypress, juniper and scholar trees etc. Some of the cypresses are over 600 years old!

Lama Temple (Yonghegong)

Lama Temple is Beijing's most frequented religious place. It is comprised of five main halls and many galleries. This temple was first the palace offered to a prince. When he gained the throne, he offered it to the Tibetan Buddhists as the religious sacred place. The Lama Temple is dedicated to the Yellow Sect of Buddhism. It is actually an active temple, with many faithful believers with burning armloads of incense. The temple has a valuable relic: the biggest Buddha statue carved from a single tree.

Beijing Capital Museum

A trip to Beijing City is not complete without visiting its museums. The museum is a five-storey

mansion, catering for a maximum of 13 concurrent exhibitions,

Beijing Olympic Park is where the 2008 Beijing Olympic Games and Paralympics took place. It was a venue for the 1990 Asian Games. The Beijing National Stadium or "Bird's Nest" is the centerpiece of this project. It hosted the opening and closing ceremonies, athletics, and football finals of the Games. The stadium has room for 91,000 spectators. It will be the site of the opening and closing ceremonies of the 2022 Winter Olympics. Now a days it is transformed into a comprehensive multifunctional activity center for the public.

This excursion of mine will always remain the most memorable and eye opening experience of my life. I will always cherish the sights that I came across during my historic journey to many different, never to be forgotten places. Having uniqueness found no where else, having travelled previously to different exotic places in Africa, West Asia and South East Asia.

If you live long enough, you'll make mistakes. But if you learn from them, you'll be a better person. It's how you handle adversity, not how it affects you. The main thing is never quit, never quit, never quit.

- William J. Clinton

Dreams

Sibghatullah
Class 4th Red

Dreams are in reality a psychological phenomenon. It is specialty with human beings to see dreams. We see good, bad and romantic dreams. Sometimes, we see extremely charming places in dreams they are commonly called "Dreams Lands" Psychologists have sound reasons for it. They say that our unconscious mind is often showing itself in dreams. It has to disguise itself in better from due to the fear of the guard of the conscious mind.

Dreams are of various types. Some of these dreams are purely physiological and we see them due to one physical disturbance or the other. A person may see that he is being strangled. Whereas,

in reality his physical thirst may be the real cause of this dream.

Some dreams are complex because one can not be sure of the duration after which the wish has been fulfilled in a dream. Some dreams are those which foretell the future events.

A famous writer says, "What devils do in their waking like, saints do in their dreams." Some dreams are just like a bright side of a picture for example. A beggar sees in his dreams that he is a prince. Much work has been done on the issue of dreams. But we are still in need of more understanding of them.

Haunted Street

Muneeb-ur-Rehman
Class 4th Blue

Everyone says that street No 58 is scary and there is a house, called dead house. One evening we all friends bravely decided to go there to solve this mystery. When we went in that house, it was very dark so we turn on the lights. We were very hungry so we started eating. Suddenly lights turned off. We became scared. So we turned on the touch. When

we turned on the torch, a ghost appeared and then disappeared. We were scared and ran away. When we reached home, when told this story to the whole colony. We never ever decided to go that street again. So I reached the conclusion that some mysteries are always mysteries throughout life.

ON THE WINGS OF POESY

Resources Gone

Shahwaiz Ahmad Nisar
8th Year D

The world is finite, resources are scarce
Things are bad and will be wares
Coal is burnt and gas exploded
Forests out and soil eroded
Wells are dry and air polluted
Dust is blowing, trees are uprooted
Oil is going, ores depleted
Drains receive what is excreted
Land is sinking, seas are rising
Man is far too enterprising
Fires will rage with man to fan it
Soon we will have a plundered planet

A Tribute to Burn Hall

Ibrahim Jadoon
8th Year B

My school is like
My Mother
Who embraces me every morning
With open Arms
My loving and caring Teachers
Are guiding stars for me
They teach me
How to choose the right path
And how to be a
Good Person

The Key to Success

Shahmir Ali
1st Year F

What's the key to success?
The confidence is the first step
The hard work is the secret
It's the key to success in your life

Raise your confidence up
So high in the world
Compete with great struggle
It's the key to success in your life

If you failed, did not succeed
Be continue your struggle to win
And the trust only in the Allah
It's the key to success in your life

The success will come one day
Very slowly and steadily
It wins the race at the end
It's key to success in your life

That's the spirit to win
The key to achieve your aims
Key to uplift you to the heights of sky
It's the key to success in your life

Days and Nights

Saboor Ahmed
10th Year F

Days and nights are all the same
I don't know what to do
While awake I think of you
I my dreams you pass through

During the day I imagine you and i
Walking beside water passing by
We climb up the grassy hills
Talk of love and of its thrill

I just want all this to last
But time passes away so fast

During the night I dream, you and i
Walking on the moon
And our hearts filled with hope
That hardship will be over soon

I know not if you feel the same
If not you are not to blame
But this is what I feel for you
And my fault is I've fallen in love with you

Now nothing can possibly change
My days and nights will be the same

Mother! the Sweetest Blessing of My Lord

Sheharyar Ali
1st Year B

The sun that is full and warm
The sun of love and of no harm
The star of heaven – star of glory
Of whom even the Angels think only
The breeze of affection but not strong
That blows fierce but not for wrong
The vain of care in the thunder of life
The light of saints in the cave of life
Soften heart but hard as steel
Only is the love she makes us feel
Without “Mother” life is cold stone
Cheered by angels but still very alone
Fragrance of lilies and purity of snow
You are my dear, so death is my foe
Give me your hand with power, of faith and spring
Life is your song that birds do sing
Life is a dying coal and so dull is earth
And nothing is pretty without your worth

Hallians Can Fly

Mian Mustafa Shah
10th Year G

It's time to fly
It's time to go high
It's time to aim high
We came to Burn Hall
From the places all dry
But now we will go high
And will never lie
We are Hallians
We can fly
We can fly
When darkness falls at night
We still move towards light
We bright up the night
So no need to fight
For the ray of light
Parents tell us not to go out side
at night
We say why
If we can escape Pakistan from light
We say why
The say don't cry
You are Hallians
You can fly
You can fly

Buy My Flag

M. Abu Bakar Butt
JC - A

Fourteen of August
A tribute to the boy who
Still sees the glamour of the flag
Through hard metal and
Eternally twining wheels
Through dust and grime
Through choking fumes
Exhausted

Green and white, star studded
Flags of independence
Fluttering like bunches of
Meaningless market wares
Green and white, the colour of
Summer grass and jasmine
Trees and icy river foam
Purity and peace
Contorted into someone else's
Dream of grasping a ten rupee note

Buy my flag! Buy my flag
So that I can pull myself out of
Rearing flames of engine heat
And hellish, growing need
So I can cool my face
Hide from the heavy weight
Of the immovable run
Reheat into some slier
Full stomached sleep
In a country of my own

Gentleness

M. Nohman Khalid
10th C

Where art thou

Oh! My gentleness

Not found now a days

Your sweet politeness

Oh! My gentleness

Where art thou

I was very comfortable, when you were in you kept me safe at least

from a sin

Oh! My gentleness

Where art thou

I was special when I had thee

Everybody listened, when you spoke in me

Where art thou

Region me not to depart again

Oh! My gentleness

Rejoin me!

Rejoin me!

To a Special Teacher

M. Waqas Azim
2nd Year B

When I started in school
This day seemed so far away

Now its here and I can't believe
That time has passed so quickly
But through your encouragement and guidance
I feel I'm ready for tomorrow challenges

Teachers play such an important part
In shaping and guiding

Especially teachers like your Sir Tashfeen
Thank you for caring so much

To a Star

M. Sohail Khan
2nd Year B

I never knew what a star could be
To someone lost in the sea
Until you came into my life
And filled my days with light
You gave me love, you gave me faith
And in giving all this, you gave me strength
I never knew, what a star lost meant
Until I lost you in my pain
And had to find my way again

My Mother is not “Employed”

Muhammad Ashar
Class 1st Green

Makes tea, sets our beds
Packs lunch, irons clothes,
Washes shirts and shorts,
And our smelly socks.

Drives me to my school
Picks me form school,
Meets my teachers,
Worries about my grades.

Buys new shoes,
The old one has holes,
Forgets to get the shoe polish
Goes back to shop, swoosh!

Pays the bills, fixes my teeth,
At the dentist who cares teeth
Answers the phone, writes notes,
Scrubs the floor, dusts the chairs,

When someone asks her
“Are you employed?”
My mom says with a smile.
“No, not really, I am a mom.”

Maths

Zakaullah Khan
Class 5th Orange

There is a subject called maths
That hits our heads like cricket bats!

There is a chapter called Algebra,
Which runs out from minds like a Zebra

There is also a system of numbers,
Which proves our heads made of timbers

There is a chapter called “Trigonometry”
Which isn’t clear without charging battery!

There is another chapter called “Sets”
Which causes major upsets!

Then there is horrid “Geometry”
Which is more like a brain factory!

Peace by Kids

Hassan Ali Asad
Class II Blue

Peace will make the world free,
Open our eyes, and helps us see.

Wars and conflicts make people sad,
Hurting others is a really bad.

Many kids live, through and awful war,
Their family ends up very poor.

During war, they often lose,
Sometimes even, their own shoes.

Let’s speak up, tell a friend,
All these wars need an end.

Peace begins when we care,
Let’s make this world, truly fair.

My Land

Nasiq Khan
Class 5th Orange

The beauty, the warmth of my land,
I see and feel when upon it I stand.
I passionately love every grain of its sand,
I know it when I smell it in my hand.

The freshness of air, the sparkle of water,
The flow of rivers, the melody of streams,
The twittering of birds, the song of winds,
Make my Land prettier than my dreams.

Lofty mountains, the cotton-colour show,
The wheat fields in which farmers plough,
The ripening of fruits, steady and slow...
My heart feels joyous when I feel this show.

I adore my land because I eat its wheat,
Drink its water, breathe in its air.
It has enabled me to stand on my feet,
If I don not care, it will be unfair.

I see the grace of my land,
Shining brilliantly like the sun rays,
At the end of my day when I die,
In the grave of my land I'd like lie

My Teaching Methodology

Arif Ameen
Department of English

Fear your pupils through your knowledge
Manage them through humour in college
I beg thee not mocking them like monkeys
Do not punish them dear like donkeys

Let innovate classics to more classics
Write on their souls like Greek's authors
Let them learn the way they want to learn
Water, shape of no shape, does not burn

Don't oppress them, if thou thyself ever
Let apart ignorance from them forever
Teach them in the sphere of their time
Say no assignment, no homework's fine

Keep the learning process in class only
Inspire these pupils through thy ability
Grasps them in your words and smiles
They are thy shields for sorrows in cries

Turn to Allah

Murtaza Shah Khan Babar
Class 2nd Green

Where do you come from?

Where do you come from?

North, South, East, or West?

It doesn't matter, where are you from!

You can soon be found

Because he is there wherever you are,

So turn, to Allah that is the best

Where do you live or where do you lie?

Where do you live in a tent or in town?

It doesn't matter where you live

You can sooner be found

Because He is there wherever you are

So turn, to Allah that is the best

There is no doubt that Sultan Tipu Shaheed House always keeps the hallmark of the house up and high. By the grace of Allah Almighty, accompanied by the true leadership of the House Master, Assistant House Masters and efforts of the students, this year too STS House expelled in sports, declamation and

The Hallmark 2013-14

academics. Although it missed the Champion Trophy just after a close contest and was declared runner-up. The athletes of STS House also showed tremendous strength of character, dedication and discipline.

They rejoiced when they won, vowed to win when they did not. No doubt the house motto is to venture their lives for the attainment of the best, no doubt how much risky that be. A glimpse of achievement of the STS House is as follows..

Sher Khan Shaheed House

Housemaster	:	Qazi Muhammad Arshad
Assistant Housemasters	:	Mr Wajid Mehmood Mr Mohsin Ramzan
House Prefect	:	Hassan Ali Khan
Assistant House Prefects	:	Hafiz Muhammad Ameen Ibtisam-ul-Haq
House Mess Secretary	:	Hassan Nawaz Khan

Sher Khan Shaheed House is a new addition in the ranks of three other Houses which existed in the past. The House was established in 2012 and has been named after a great hero of Nation Captain Sher Khan Shaheed (Nishan-e-Haider). The Hallians of this house derive great inspiration from the heroic life of Captain Sher Khan Shaheed (Nishan-e-Haider) who started his career as an Air-Craft man in Pakistan Air Force & earned a regular commission in Pakistan Army as a 2nd Lieutenant and proved his loyalty for his Nation through his great sacrifice and the Nation responded in the same manner awarding him the highest military award Nishah-e-Haider. The Hallians of this house pledge to follow the footsteps of great Shaheed and will Insha-Allah keep this torch of Shuhadaah high and inspiring for the young Hallians.

شہادت ہے مطلوب و مقصود مومن
نہ مالِ غنیمت نہ کشور کشائی

Sher Khan Shaheed House despite a new house, it has shown an excellent performance in academics as well as in sports. The House has secured many positions in curricular and co-curricular activities. Although this year, the House could not get Inter-House Championship Trophy, however it produced a remarkable percentage of players in college sports team.

The achievements of House are as follow:-

English Literary Society

Incharge	: Mr Aamir Khurshid
Assistant-in-Charges	: Mr Mansoor Alam Khan Mrs Rabia Nazir
President	: Usman Masood
Vice President	: Saad Zaman
Secretary	: Fahad Zaman
Joint Secretary	: Muhammad Ali Javed

The English Literacy Society of the College has always shown academic excellence in all curricular has successfully conducted the Inter House Declamation Competitions both for Juniors Seniors time and again. In addition it has also organized the essay writing competition as well.

The Society sent its students to All Pakistan Bilingual Declamation Competition all over the country and the Hallians put up a very good show and proved their worth and amused the listeners with their wit and oratory and brought lards to the College.

In addition to debates the Society organized various programmes in order to develop the personality and calibre of the Hallians.

Biology Club

Incharge	:	Mr Muhammed Hanif
Assistant-in-Charges	:	Mr Shad Muhammed Miss Sadaf Massey
President	:	Ahmad Rehan-ul-Haq
Vice President	:	Jazib Ali
Secretary	:	Farrukh Iqbal

It is a fact that scientific development shows the development of a country. It is the need of the day that besides theoretical teaching, students should be involved in the practical and creative work at the grass root level. In this connection students do research before building a model and ensures provision of related knowledge.

Like the previous years, the biology club along with its all members remained busy in preparing models and doing science activities. Our goal is to expose member to academics and career opportunities.

All members of biology club took keen interest in their scientific work. Some of the notable models were CT scan, circulatory system, respiratory system, food pyramid, ecosystem, Dengui life cycle etc. The efforts of the students were highly appreciated by the Chief Guest of Parents Day.

Chemistry Club

Incharge	: Mrs Saira Bano
Assistant-in-Charges	: Mr Zahid Mehmood Mr Atif Mumtaz Mr Fida Malik
President	: Usman Abbasi
Vice President	: Ijlal Haider
Secretary	: Fahad Zaman

Displaying academic excellence, the Chemistry Club took keen interest in the demonstration of various skill as well as working models and projects this year. It is an obvious fact that students were imparted more practical knowledge of their subject in a better fashion when their own creative abilities were utilized in the preparation of models and projects. This was the aim before us the difficult task of planning and putting together the various projects in the chemistry labs. We are thankful to God that the strong patience of the students and the able guidance of the club incharge bore fruit and a successful chemistry exhibition was held on the parents day in chemistry lab.

Projects like Water purification plant, solar heating system in houses, volcanic eruption, plant for manufacturing of bleaching powder, were not only highly interesting but also showed the tiring efforts of the club members. The respectful Chief Guest and the honourable guests highly appreciated the hard work of the young scientists. In return we are debted to the Principal & the CI who provided us help and guidance that we needed at every step.

Electronics Club

Incharge
Assistant-in-Charges

President
Vice President
Secretary

Mr Qasim Abbasi
Sir Ali Hafeez
Sir Wasib Ali
Sir Ibrar Tandi
Sir Wajid
Abdul Wahab Bangash
Taimoor Paracha
Mutsaim Hussain
Malik Waleed Ahmed

Like every year, this year also the Electronics Club has fascinated the viewers by its and class science projects which include projects of: Mechanics, Dynamics, Physics, Electronics, rocket Science and much more. Electronics Club develop the minds of Hallians in a creative way which helps them to understand science in the best way. Electronics club is the best of the others in the present stage. Some of its best projects this year are:

1. Friendo meter
2. Check Yours patience
3. Water Rocket
4. Water Level detector
5. Remoter controlled Camera Car
6. Catapult
7. Automatic street lighting system
8. Remote controlled Helicopter
9. Baghdad Battery
10. Production of Electricity by ruits and Potatoes

Computer Club

- Incharge** : Mr Zubair Ahmed Lodhi
Assistant-in-Charges : Qazi Adnan-ul-Haq
Mr Jamshaid Ali Turi
President : Muhammed Umer
Vice President : Jahanzeb Sadiq
Secretary : Rana Saad

In today's world Information Technology plays a vital role. Not only it has brought the people closer to one another but also it has brought the World to our finger tips, if we need any information it is just one click away.

The college is well aware of the importance of Information Technology and has introduced the computer subject right from the lower level so that the Hallians should be kept abreast with the ever changing global scenario.

Apart from all this the college has established the Computer Club where students are provided with ample opportunities to show their skills in Information Technology. The Club is provided with upto date well equipped Computer Lab. Time and again the visitors appreciated the efforts put in by the young Hallians.

Fine Arts Club

Incharge	:	Mrs Rubina Sohail
Assistant-in-Charges	:	Mrs Mehnaz Mrs Jamila Gul Mrs Rabia Nazir
President	:	Ahsan Chohan
Vice President	:	Raja Mughees
Secretary	:	Rana Saad

The clearest definition of fine arts is a visual considered to have been created primarily for aesthetic purposes judged for its beauty and meaningfulness especially, painting, sculpture, drawing, water colour, graphics and architecture. The word “fine” denotes the purity of the discipline.

Fine Arts Club provides an opportunity to the students to show their talent, express their aesthetic skills, sense and taste by creating beautiful pieces art and different channels such as landscapes, photography, sketching, glass work, mosaic, collage work etc. As always the Fine Arts Club has been rendering valuable services and remains busy throughout the year in exhibiting profound talent and creative abilities of Hallians.

On Annual Parents Day and Prize Distribution Ceremony, the Club gave marvellous display. The gallery was greatly appreciated by the Chief Guest and Parents.

Drama Club

Incharge	: Mrs Aniqah Anwar Shah
Assistant-in-Charges	: Mrs Nuzhat Mumtaz Mrs Mehnaz Khan
President	: Zahid Mohyuddin
Vice President	: Mazhar Manzoor
Secretary	: Nouman

Drama is the fountain of life for the children. It gives sparkle to home, school or wherever children gather. Children are actors without stage fright. They perform as expertly to an empty hall as to a full house. They say what they feel and feel what they say. They unashamedly use enormous conceptions and unintentional puns. Creativity abounds, children ride a plant 'horse', eat sand 'cakes' and drink water 'drinks' without apology for their realism. If adult have sensitive ears, eyes and hearts, they may be moved from the deepest anguish to poetic ecstasy or be entertained by rollicking slap stick.

Drama is something that we all engage in daily life. Drama has a role to play in all the four skills; reading, writing, speaking and listening. This year too the Drama Club of the College was busy in the creative faculties of the Hallians. On the occasion of Annual Parents Day and Prize Distribution Ceremony, they presented an English Play 'Twelfth Night' which was very well appreciated by the guests and also a tableau based on the song of Jawad Ahmed to highlight the sense of patriotism among the masses. Apart from these the young Hallians long various folk songs to show the national harmony.
